

SARS-COV-2

Serology Assays

GSD group's portfolio for the diagnostic of COVID-19

End of 2019, an outbreak of the novel identified SARS-CoV-2 virus (Severe Acute Respiratory Syndrome Coronavirus 2) spread worldwide and has now been designated a pandemic by the WHO. Reliable testing will play an important role in combating the disease by allowing us to know who has been infected, while also increasing our ability to prevent the spread of infection.

We can offer you a comprehensive portfolio for the SARS-CoV-2 diagnostic together with our partners of the Gold Standard Diagnostics (GSD) group, consisting of Gold Standard Diagnostics Inc., VIROTECH Diagnostics GmbH and NovaTec Immundiagnostica GmbH.

SARS-COV-2

Serology Assays

The GSD SARS-CoV-2 IgG, IgA and IgM ELISAs are intended for the qualitative detection of IgG, IgA and IgM antibodies to SARS-CoV-2 virus in human serum to aid in the diagnosis of Coronavirus (COVID-19). The assays are an ideal supplement for the direct pathogen detection and are a valuable tool for epidemiological studies.

Assay Features

- Separate Detection of IgG, IgM and IgA Antibodies
- Advantages of the GSD Reagent System
 - Total incubation under 2 hours
 - Ready to use controls
 - Assay procedure is easy to automate

Product	Order No.
GSD SARS-CoV-2 IgG	GSD01-1028
GSD SARS-CoV-2 IgA	GSD01-1029
GSD SARS-CoV-2 IgM	GSD01-1030
